SUMMARY

Software Engineer with experience in full-stack web development using MERN Stack, Next.js, and Python. Completed two internships building web applications with authentication systems and test coverage. Recent graduate with hands-on experience in Python development through academic projects.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python.
- **Frameworks & Tools:** React.js, Next.js, Node.js, Express.js, Tailwind CSS
- **Python Libraries:** TensorFlow, NumPy, Pandas.
- **Development Practices:** OOP, Agile, SDLC, RESTful API design, JWT authentication, Git version control, unit testing with Mocha and Jest
- **Databases:** MongoDB, Microsoft SQL Server.
- **Additional Tools:** Postman, SonarQube.

WORK EXPERIENCE

MERN Stack Intern | *10Pearls* | Karachi, Pakistan

4 *October 2025 – 7 December 2025*

1. *Built* a Full Stack Notes application with user registration, login, and CRUD operations using MongoDB, Express, React, and Node.js
2. Wrote 18 Backend and 6 Frontend unit tests using Jest to verify API endpoints and component functionality
3. Set up SonarQube to check code quality metrics and addressed issues flagged in reports
4. Implemented secure RESTful endpoints for user authentication using JWT tokens
5. Collaborated with senior developers during code reviews to improve code structure and implement feedback.

MERN Stack Intern | *RealTech Solutions* | Karachi, Pakistan

1st *August 2025 – 30 September 2025*

1. Updated and maintained modules in an ERP system built with Node.js and Express
2. Wrote SQL queries to pull data from Microsoft SQL Server and display reports on dashboards
3. Designed interfaces for viewing business data such as sales figures and inventory levels
4. Reduced page load times by 20% through optimizing API calls and database queries
5. Worked in a team environment to fix bugs reported by users and tested solutions before deployment.

PROJECTS

Chest Guard: Medical Image Analysis System (Final Year Project)

Technologies: React, Node.js, Express, MongoDB, Python, VGG16

1. *Architected a web application to analyze a dataset of 4500+ chest X-ray images for signs of Tuberculosis and Pneumonia*
2. Designed *the frontend interface in React with Tailwind CSS for uploading images and displaying results*
3. *Constructed robust backend APIs in Node.js to receive images, send them to VGG16 model, and return predictions*
4. *Trained deep learning model in Python and integrated it with the web application via REST API*
5. *Stored user data and prediction history in MongoDB database*

Ecommerce Marketplace (72-Hour Hackathon)

***Technologies**: Next.js, Sanity CMS, Clerk Auth, Stripe*

1. Built an online store with 4 product pages, shopping cart, and checkout process in three days
2. Used Sanity CMS to manage product data including names, prices, descriptions, and images
3. Implemented Clerk for user account creation, login, and session management
4. Integrated Stripe API for processing test payments during checkout
5. Created admin dashboard to view orders and update order status

EDUCATION

Bachelor of Science in Software Engineering (BSSE) (Completed)

Sir Syed University of Engineering and Technology | Karachi, Pakistan

Graduated: 2025
